New York, NY • d herskowitz@gmail.com • +1 347-433-1771

Professional Summary

Director of Technology and hands-on Senior Software Engineer with 10+ years of experience designing, modernizing, and operating internal business systems for logistics and operations-driven companies. Strong background in backend systems, integrations, cloud infrastructure, and operational tooling.

Core Skills

Backend & APIs: Python (Django), PHP (Laravel), Node.js, REST APIs, familiar with Go

Frontend & Mobile: Vue, Ionic (Angular), JavaScript, HTML, CSS

Databases: PostgreSQL, SQL Server, MySQL, indexing, audit logging, performance tuning

Cloud & DevOps: AWS (S3, RDS, Elastic Beanstalk, networking), Docker, Linux, Nginx, GitHub Actions

Integrations: EDI (Stedi), CargoSnap, Google Document AI, SMS automation

Professional Experience

Eastern Drayage

Director of Technology / Senior Software Engineer | May 2022 – Present

- Own all internal technology platforms across backend services, integrations, customer portals, and driver applications
- Stabilized and enhanced a legacy core application, significantly improving reliability and reducing crashes
- Designed and implemented audit logging across primary data sources and improved database performance through indexing
- Led EDI architecture including trigger-based event logging and queue-based processing integrated with the Stedi API
- Developed Laravel APIs and internal admin systems supporting customer portals and driver applications
- Built Vue-based customer portal and Ionic (Angular) driver application deployed as a PWA

- Implemented CargoSnap imaging workflows to standardize cargo and container photo documentation
- Designed emergency data backup systems and led migration from legacy servers to AWS cloud infrastructure
